

# Ambrace YOUR TRUE COLOURS

1.

Find a piece of beige (camel/taupe) and a piece of charcoal (grey/steel) fabric. Anything will work, a cloth bag, a pillowcase, a tea towel, a cushion.

2.

Remove all makeup, and stand in front of a mirror with natural light.  
TIP : Use a hand mirror next to a window if you need.

3.

Hold the fabrics close to your chin, and alternate between the two pieces, looking for the following:

*Stylist Tip*

*If you're having trouble deciding, take a selfie with each piece then flick back and forth between the pics and you'll pretty quickly see!*

One will make your skin glow, and one will highlight the imperfections in your skin tone, and make you appear sallow and sickly.

One will make your eyes shine and one will show up the dark circles under your eyes.

One will make your lips and teeth pop, and one will make them appear dull.

If the **Charcoal** fabric makes you shine then you have a **COOL** skintone

If the **Beige** fabric is your winner then you have a **WARM** skintone

Now flip over the page to check out your best colours!

THE STYLE ENGINEER

# Cool

## SKINTONE

As a cool skintone, you could fall anywhere between a Winter (Deep) and a Summer (Subtle). Your complexion will be accented by cool, clear, bright colours: colours of the rainbow. Look for clear tones with pink, red or blue undertones like blue-red, white, black. Jewel tones look amazing on you like emerald, ruby and sapphire. Avoid anything that's blended, muted or has a warm and golden undertone to it.

# Warm SKINTONE

As a warm skintone, you could fall anywhere between an Autumn (Deep) and a Spring (Subtle). Your complexion will be accented by rich golden, spicy and earthy colors. You can wear both muted and rich, warm colours like the autumn foliage or exotic spice colours. Look for anything with yellow, peachy or golden undertones. Avoid clear bright colors, as well as pure white and black, a beige or brown is preferred.
